

COMPANY PROFILE.

2026 EDITION

HELLO.

Strategy. Management. Operations.

RG CONSULTING — NAIROBI, KENYA

Whether you are setting up your first business or streamlining your supply chain — welcome to your dedicated support system.

At RG Consulting, we provide end-to-end guidance to simplify complexity, optimise your workflows, and build a foundation for sustainable success. This profile tells you who we are, what we do, how we work, and why it matters.

Results-Driven

Kenya-Rooted

Globally Proven

About Us.

RG Consulting is a dynamic management consultancy based in Kenya, dedicated to fostering business excellence and sustainable growth across diverse sectors.

With a deep understanding of local market dynamics and global best practices, we empower organizations to navigate complex challenges and seize new opportunities.

Our expertise lies in transforming businesses through strategic guidance, operational excellence, and the development of high-performing leadership teams.

RG Consulting targets medium to large tier organizations and manufacturers seeking to manage change effectively, deliver turn around in operational excellence, unconstrain their supply chains, while developing their people and leaders through these best practices..

WHO WE ARE

About Us.

What we do.

RG Consulting offers management consultancy services to organizations both in Kenya and the East Africa region, with a specific focus on operational excellence and supply chain solutions. These solutions are anchored on people and leadership development in order to guarantee sustainable success.

How we do it.

RG Consulting is all about intentional collaboration. We cultivate teamwork both internally and externally that ensures delivery of sustainable solutions. Our approach is not generic – it is tailored to suit each organization's needs. We walk with you from problem definition and diagnosis to problem resolution and control.

Why we do it.

RG Consulting is passionate about unlocking organizations' full potential. From resolving execution, operational and supply chain inefficiencies, to relevant leadership development, we are invested in transforming daily challenges to daily wins that guarantee scalable long-term success. Simply put, RG Consulting is here to consistently win with you.

MISSION

Mission

To deliver tailored, results-oriented consulting services that enable our clients to embed world-class strategies, establish robust operations, manage change effectively, and cultivate high-performing leadership teams.

VISION

Vision

To be the leading management consultancy in Kenya, recognised for impactful solutions that drive organisational success and contribute to the economic prosperity of the region.

RG CONSULTING

OUR SERVICES

A Comprehensive Suite of Services.

RG Consulting supports businesses at every stage of their lifecycle — from inception through to sustained operational excellence. Five integrated practice areas. One focused partner.

Change Management

Governance

Operational Excellence

Manufacturing

Supply Chain

Organisational Change & Transitions

In today's rapidly evolving business landscape, effective change management is the difference between surviving and thriving. We guide organisations through significant transitions — from digital transformation to structural restructuring — minimising disruption and maximising adoption.

Operational Redesign

Building new operational blueprints that eliminate inefficiencies and position your organisation for the next phase of growth.

Digital Transformation

Guiding teams from legacy systems to scalable, modern digital operations — with people and culture at the centre of every transition.

Restructuring & Resource Optimisation

Right-sizing structures, clarifying accountability, and aligning resources to strategic priorities without losing momentum.

SERVICE AREA 02

Operational Excellence

World-class operations are not accidental. We identify the gap between where your organisation stands today and where best-in-class looks like — then build the precise path to close it.

Efficiency Improvement

Streamlining workflows and optimising resources to minimise waste, lower operational costs, drive top-line growth, and build a highly competitive foundation.

Continuous Improvement Culture

Embedding an organisation-wide mindset of incremental progress — transforming processes, systems, and people to ensure compounding innovation and resilience.

Governance

Sustainable organisations are governed with intention. We embed the structures, standards, and accountability systems that protect people, planet, and performance — across every pillar.

Health

Prioritising workforce physical and mental well-being to cultivate resilient, high-performing teams.

Safety

Implementing strict workplace standards and proactive risk mitigation to protect employees and prevent disruptions.

Environment

Minimising ecological footprint through responsible resource management and sustainable practices.

Sustainability

Integrating economic, social, and environmental responsibility into core strategy for long-term profitability.

Quality

Enforcing strict assurance standards so products and services consistently exceed customer expectations.

Audit & Compliance

Adhering to legal and industry regulations to mitigate risk and maintain deep stakeholder confidence.

SERVICE AREA 04

Manufacturing

From engineering to output — we help manufacturing operations achieve the reliability, efficiency, and cost performance that competitive markets demand.

1

Engineering

Designing and maintaining robust technical systems and physical assets to guarantee maximum reliability and production excellence at every shift.

2

Project Management

Delivering capital upgrades and expansions on time and within budget — accelerating scale while minimising financial exposure.

3

Production

Transforming raw materials into high-quality finished products reliably, satisfying market demand and fuelling steady, predictable revenue.

4

Process Optimization

Analysing production data to eliminate bottlenecks, minimise yield losses, and systematically lower manufacturing costs to boost profitability.

RG CONSULTING

SERVICE AREA 05

Supply Chain

Resilient supply chains don't happen by accident. We design and optimise end-to-end supply ecosystems that absorb shocks, satisfy customers, and keep your business moving.

Sales & Operational Support

Synchronising commercial demand with operational capacity to eliminate bottlenecks, maximise customer satisfaction, and drive efficient, scalable growth.

Inventory Management

Balancing stock levels to fulfil market demand seamlessly while optimising working capital, maximising cash flow, and minimising supply chain shocks.

Vendor & Supplier Management

Building strategic supplier relationships with robust performance frameworks that reduce dependency risk and ensure consistent quality at competitive cost.

OUR DIFFERENCE

Why RG Consulting?

20+

Years of combined
sector experience

Kenya First.

Global methodology.
Local mastery.

0

Context-Driven, Not Template-Driven

1

Every engagement begins with deep diagnosis. We tailor solutions to your specific sector, size, and stage. No copy-paste. No generic frameworks.

0

End-to-End Accountability

2

We stay with you from strategy through execution to review. Our success is measured by your outcomes — not by deliverable count.

0

Cross-Functional Depth

3

From manufacturing and supply chain to governance and C-suite leadership, our consultants bring real operational experience to every engagement.

0

Built for Kenya. Ready for Africa.

4

We understand Kenyan regulatory environments, talent markets, and East African business dynamics — while applying globally proven methodologies.
